BEREISHIT & BUTTERFLIES!

Could the flap of a butterfly's wings in Brazil set off a tornado in Texas?

SOME SCIENTISTS SUGGEST THAT THE FLAP OF A BUTTERFLY'S WINGS MAKES A TINY CHANGE IN WIND PRESSURE. THIS TRIGGERS A SERIES OF CHANGES THAT CAN AFFECT WIND CONDITIONS AND POTENTIALLY ALTER THE DIRECTION OF A TORNADO THOUSANDS OF MILES AWAY.

WHILST MOST OF US AREN'T INVESTIGATING BUTTERFLIES, THIS IS A REALLY INTERESTING IDEA TO THINK ABOUT IN THE WEEK OF **BEREISHIT**.

Bereishit, in the beginning... God created a vast, detailed and intricate world. Every tiny action has impact and we all have our place.

WHEN WE MAKE AN EFFORT TO NOTICE THE DETAILS IN THE WONDERFUL WORLD AROUND US WE APPRECIATE **THE WONDER OF CREATION**.

EVEN WHEN WE'RE NOT MAKING TORNADOES, OUR BEHAVIOUR ALSO HAS AN **IMPACT**...

SO, LET'S TRY AND MAKE IT **POSITIVE!**
