

MAKE YOUR OWN DREIDEL

1. Colour your dreidel in and cut out the dreidel along the outside edge.
2. Carefully poke a pencil through the dotted circle to make a hole.
3. Fold along all the dotted lines to make the shape of your dreidel.
4. Glue or tape the flaps as shown to construct your dreidel.
5. Push the pencil back through the hole until the point sticks out at the bottom. The top of the pencil will be the handle you use to spin your dreidel.
